

BALOGH

Transceiver PM-15

Identification Systems

Description

The PM-15 hand-held R.F.I.D. interface unit from BALOGH. This portable light-weight unit is great for line diagnostics, and durable enough for on-the-line productivity. It's of sleek design and feature packed. The PM-15 has the ability to interface with BALOGH's high quality line of Read/Write Radio Frequency Identification TAGS.

- Configurable for BALOGH's passive "OMA" series Read/Write TAGS, and "OMX" series High-Speed Read/Write TAGS.
- 4 line LCD display, back-light, and hand strap.
- Touch pad key entry, with bidirectional cursor movement.
- Automatic self-test on power-up. Built-in scrolling help menu. Powered by 4 AA rechargeable Ni-Cad or Alkaline batteries.
- Programmable function keys.
- 64K internal data buffer.
- Read, Write, and Initialize TAGS.
- Quick connector port for access of a remote transceiver.
- Data editor.
- Displays data in byte or word format, hex, decimal, binary, or ASCII.
- Display last TAG's status.
- Optional "RF" charger (non-contact recharging of Ni-Cad batteries).

Options:

SPM 15 110 Charger Base
TD71 Remote Head
TD93 Remote Head
